Digistore24 Link Testing Checklist

Run this checklist before publishing every new promolink placement and after any vendor-page or campaign change.

- | |
|---|
| ☐ The promolink contains the correct Digistore24 affiliate ID. |
| ☐ The placement uses a unique campaign key. |
| ☐ The campaign key follows the campaign naming rule. |
| ☐ The promolink opens the intended vendor sales page. |
| ☐ The redirect works in a private or incognito window. |
| ☐ The destination works on desktop and mobile. |
| ☐ The product, price, billing terms and refund information match the promotion. |
| ☐ The affiliate disclosure appears before or beside the recommendation. |
| ☐ No generic link shortener interferes with Digistore24 tracking. |
| ☐ The placement URL, promolink and campaign key are recorded in the Campaign Workbook. |

SAFE TESTING NOTE

Do not place a real order merely to test tracking. Use Digistore24's supported link checks and reporting guidance.
